Incident Description:

On the morning of 15 March 2026, a severe storm system passed through Princeton NJ producing sustained winds of approximately 65mph and significant hail accumulation. A large oak tree was uprooted and fell across the main structure of the residence. The tree caused substantial damage to approximately 40% of the total roof surface, collapsed the rear sunroom and caused water ingress into the master bedroom. Structural assessment by Harmon & Associates on 17 March 2026 confirmed the building unsafe for full occupancy pending repairs.
